Outer (au·tər), *a.* (*sb.*) Forms: 3–6 **outer**, (5 **outar**), 5– **outer**. [A new comparative formed immediately on Out, instead of the inherited form Utter from OE. *ūterra*, *attra*, which had ceased to show relationship to *out*; cf. *late*, *latter*, *later*. Occasional examples of *outer*, *outter* occur in Chaucer MSS., and the *adv. outerly* was very common in 14–15th c.; but, though found in the Bible of 1611, *outer* was not frequent till the 18th c., *utter* being usual in the sense 'exterior' till late in the 17th c.

The superlatives going with *outer* are Outmost and Outermost. Supplementary forms found in late ME. or early mod. Eng. (forebears of corresponding forms mentioned under Utter) are compar. Ouderore, Outyere, superl. Outemest. Like the other comparatives of this kind, *outer* is not followed by *than*; we do not say *outer than*.]

†**Out-fangthief.** *Old Eng. Law. Obs.* In 1 *utfangenes þeof*, *utfangenetheof*; 3 *utefang-*, *utfangen-*, 4– *outfangen(e)*-, *-fange-*, *-theef*. [Answers to an OE. type *útfangenes þéof* (accusative case) 'out-caught thief'; but the expression appears to have come into use later, to match *infangenes þeof*, Infangthief, q. v.] A franchise of a kind of a private jurisdiction, more extensive than that of Infangthief; originally, the lord's right to pursue a thief (at least when the latter was 'his own man') outside his own jurisdiction, bring him back to his own court for trial, and keep his forfeited chattels on conviction. But the right was variously defined or circumscribed in the 13th c., when its meaning seems to have already become conjectural.

The term *infangenes þéf* occurs in several OE. Charters, but of *útfangenes þéf* no trace has been found except in the alleged charter of Edgar cited for Hoch Central Sac. No. 1901, which has the Latin phrase 'cum foris comprehensus fuerit ut fur.' The apparent equivalent of an OE. 'útfangenethéf' and 'útfangenesmon'. But this is extant only in the *Liber Raffhensis* (1130–40), and may be spurious, or the phrase may be a verb to interpolation. The term is wanting from an Eng. Fr. Glossary of Law Terms compiled 1110–1130 (Wright *Reliq. Antiq.* I. 33) which contains *infangenetheffabrycon* pris sur comun terre'. On the other hand, *útfangenes þéof* occurs in the forged Charter of Edgar to Glastonbury (Birch, No. 1117), which was in existence before William of Malmesbury made the third version of his *Gesta Regum* (1130–40) in which the charter is given) and is now dear go back to 1020, or even earlier.

The etymological sense 'out-caught-thief', i.e. 'thief apprehended outside (the jurisdiction), is that assigned to it in the Rhyme record of 1108, in which the grant of 'infangthef & utfangenethef' was explained as giving the grantee the right to try 'his own thief' wherever captured, whether within or without his territorial jurisdiction. But Bracton and Fleta explain it as the right to try thieves coming from without, and apprehended within the lord's jurisdiction; they both expressly deny that it means a thief taken outside; or that such a thief might be brought back into the jurisdiction to be tried. Fleta however adds that, after his own thief had been condemned by the outside tribunal, the lord might bring him into his jurisdiction and hang him on his own gallows; and the right to do this appears to be all that Bracton leaves to 'the franchise of utfangenethef'.

Early legal use had forms identical with AFr.; but forms with *outlaw-*, conformed to the contemporary Eng. word also occur from 14th c.]

1. The action of putting a person out of the protection of the law, or the legal process by which a person is or was proclaimed or made an outlaw; the condition of one so outlawed. † In early use, often = exile, banishment.

'Outlawry, at first a declaration of war by the commonwealth against an offending member, (gradually) became a regular means of compelling submission to the authority of the courts, as it long continued to be down to modern times'. 'Before the Conquest, outlawry involved not only forfeiture of goods to the King, but liability to be killed with impunity'. In the 13th c. 'outlawry bore some of its primitive character, instead of being a substantive punishment, it became mere "criminal process", a means of compelling accused persons to stand their trial'. (Pollock & Maitland, *Hist. Eng. Law* I. 27, 459.) In the 14th c. the process was extended from cases of felony to misdemeanors and civil actions, so as to be a punishment for contempt of court in not appearing to answer an indictment or defend a personal action, or for disobedience to a judgment of the court. Outlawry for debt was frequent down to the 18th c. Along with the extension of the process, its conditions and consequences underwent successive mitigations: in later times, in civil actions, it was reduced to the fact that the outlawed person was incapacitated from prosecuting an action for his own benefit, though he might still defend himself.

Glanvilla Outlyerum. In civil proceedings outlawry has long been obsolete, and was formally abolished by the Civil Procedure Acts Repeal Act of 1879 (42 & 43 Vict. c. 59). While it was in use, great injustice was often done to consequences of the lawfulness of the mandatory for giving particulars of the fact that a defendant in a personal action had, as a result of civil process, been made an outlaw. In 1788–9, 32 Eliz. c. 3 was passed 'for the avoiding of secret Outlawries in Actions Personall against the Queenes Subiects'. This being subsequently considered insufficient, unending pressure were introduced; and one such bill has had the singular fortune to become the formal instrument of asserting the right of Parliament to proceed to business without reference to the immediate cause of summons, by being introduced and read a first time as the first business of every session, before the reading of the King's or Queen's Speech. This precaution goes back to early times, being referred to as an established practice in 1614. Frequently done and still was used for the purpose on each occasion (and since 3 Dec. 1741, the session and early appointed has been a Bill 'for the more effectual preventing Clandestine Outlawries in personal actions'; and date is still annually introduced, although the outlawries against which it is directed have long disappeared.

[Prob. a dial. form of earlier (cf. Lisgar *sb.*[1]), subsequently assimilated in various ways by those to whom the dial. *ligg*, to lie, was unknown. Du. has analogous noun of *uitligger*, -*liggen* 'outlier'; but the later date of the forms is (notwithstanding Dampier's assertion: see sense 2) from being viewed as the source of the Eng. word.

Du. *uitliggen* 'outlier' appears in Kilian, 1598, only in the sense of 'vagabond guard-ship lying out in front of a port, etc.' From 1672 (Wicquefort *Ambassador* 59 n) it is found in a sense akin to 2 below. The 'outrigger' of the Indies seems never to be described in Du. works from c 1600 without any name; in Valentijn *Oud en Nieuw Oost Indien* I. 1 (1724) it is called *uitrol* (i. e. wheel), the name still in common use; but beside it the name *uitligger* is found in Dutch dictionaries of the 19th c. (Twaye *Woordenb.* of 1st ed., 1847, 1853, etc.). Thus, so far as yet known, both uses of *uitligger* are later than the corresponding senses of the Eng. word.]

Out of (*outtȝfr*), *prep. phr.* Also 1–4 ut of, 4– out o, (7– o'), 4–7 out a; 4–6 oute, owt, 9 ot. [orig., and still in writing, two words, viz. the adv. OUT followed by the prep. OF (in its primary sense = from). In analysis *out of* is precisely on the same level with the obs. *ahrne of*, *up of*, and the current *forth of*, *out from*, *out to*, *driven from*, and other instances of an adv. followed by a prep. which defines its relation to an object. But in OE. as in OS. and the Scandinavian langs. *ût of* (OS., ON. *út af*, Sw. *ut af*, Da. *ud af*) became the regular equivalent of L. *ex*, Gr. ἐξ, *ex* (while Ger. and Du. used the adv. itself as a prep.); *out of* has thus acquired a unity of sense and also of pronunciation, which entitle it to separate treatment, whereby also its own sense-development can be more distinctly exhibited.

The history of *out of* is partly parallel to that of *in to*, with the difference that the latter is now written *into* as one word, and that *out of* is the opposite, not only of *into*, but also of the simple *in*. One reason why *out of* has not reached so far in writing as one word may be that the distinction now made between *into* and *in to* is in the case of *out* expressed by *out of* and *out from*: thus 'they came in to me, into my house', 'he went not from me, out of my house'.]

Outputter and *outpusher* are here applied to the same person. Either of these may be a misprint for the other, or the words may be used as synonyms: cf. 5. A term applied to certain maintainers and abettors of thieves or freebooters.

In 3 Hen. V, it appears from the context to be applied to persons in Redesdale who maintained and fitted out thieves for depredations in the adjacent counties: cf. OUTSET 3 and 4. Sir Jackson seems to have understood and used it of persons who put out their neighbours' cattle or goods into places handy for thieves with whom they were in league: cf. OUTPUT 2. The *outputters* of 1421 were not the neighbours of the persons robbed, but thieves living beside the thieves in Tynedale and Redesdale.

1884 SIR JOHN *Chron.* 11. v. *Jackson, Quon Chaplerton* vocant *...vocantur Outputters* nuncupati.

Hist. Rankers Ring vocant, of the Statutes (cf. 1547) reads in the Act of 1421 'felons called rankers and outputters'; an obvious misprint, which was however repeated in all editions previous to that of Ruffhead in 1763 (which retains 'outputters' in the text with 'outputters' in the margin). Hence 'outputters' was accepted as a genuine word by Cowell, who in his *Interpreter* further identified the 'outputters' with the third, with which testimonial explanation the bogus word has duly reappeared in the Law Dictionaries down to Wharton, as well as in Phillips, Kersey, Bailey, Ash, Tomlins, Ogilvie's *Imperial Dict.*, *Century Dict.*, and Funk's *Standard Dict.*; it was endorsed by Johnson and Webster. As if one error were not enough, Wharton has also *Outputter*, with an explanation founded upon the latter part of Cowell's article, but omitting 'nuns or house' here 'nunne house'). This last blunder is taken over from Wharton by Cunnell (*Imperial Dict.*), Ogilvie, and *Century Dict.* (all professing to take it from Cowell). In Hodgson, *Hist. Northumbld.* pt. ii. I. 60, the 'outputters' of 1421 appear as a new genus as 'outputters', erroneously said to be used in the Supplication of 1421, which has *Outputtours*.

A term used as the English equivalent of Welsh *ofydd*, now applied to an Eisteddfodic graduate of a third order, beside 'bard' and 'druid'; the name and its application being artificially affiliated to those of the Gaulish *Οὐάτεις* mentioned by Strabo.

Hist. Gwynedd, was Strabo's Greek transliteration of the Proto-celtic **wātis* (Sanskrit, gl. of **vātis* (or **vātēs*) 'manifestors, prophets' = L. *vātes*, Olir. *faith*, mod. It is also the Welsh form, in 14th c. books, of the proper name *Ovid*. It has no connexion, etymological or historical, with *ovate*. The imaginary etymology appears first in Henry Rowlands in 1723. From him it was taken up by Edward Williams (Iolo Morganwg) and W. Owen (Pughe) who introduced *ovate* as the English equivalent, 1792–4.

1723 H. ROWLANDS *Mona Antiqua* 89 Diodorus Siculus and Strabo, which, in Stevin 280, for Authority, prove them to be Bards, *Ovadas* or *Ovates*, *Eubages*, *Druides* or *Druidæ*.

Over- is used with adverbial, prepositional, and adjectival force, in combination with sbs.; with adverbial and prepositional force in comb. with verbs; with adverbial force in combination with adjs., advbs., and prepositions. Its combinations are therefore exceedingly numerous, and, from the wide range of its meaning, very diverse in character. The following are the chief classes; but many words have arisen falling under two, three, or more of these, and there are individual words in which the original sense of the prefix is so modified that it is difficult to assign them to any class. In some of its uses, moreover, *over-* is a movable element, which can be prefixed at will to almost any verb or adjective of suitable sense, as freely as an adjective can be placed before a substantive or an adverb before an adjective. Although usually hyphened or even written as one word, such combinations are hardly dictionary-facts; they are really syntactic combinations which make the use and construction of *over-* in the particular position more clear and obvious. In some of these combinations, however, there is a closer unification of sense, and others have a long history which it is desirable to show. All important combinations of *over-*, therefore, including such as occur in more than one sense, and all such as seem to require explanation, are treated as Main words in their alphabetical places; of the unimportant or obvious ones, examples are here given under the classes to which they belong, with a few illustrations; but no attempt is made to enumerate all that have been used, much less all that are possible.

Other than adv. in Gothic, *ufarô* and *ufar-* in OHG., *ofar* in OS., *ofer* in Ger., *over* in Du., *yfer-*, *ofr-*, *of* in ON.) was already in OE. used in comb. with vbs., as *ofercuman*, *ofercuma*, *ofercuman*, *ofercuma*; with sbs., as *ofercildness*, *ofercild*, *ofercildness*, *ofercildu*; with adjs., as *ofergylden*, *ofermæst*, *ofermödig*, *ofermöde*, *ofermöd*, *ofermödi*; also in advbs. formed from adjs., and in derivatives of phrases, as *ofermödlice*, *ofermödlice* from *ofer mód*. Many of the OE. compounds are still in use, but the more part failed to live into ME., and the great majority of existing *over-* combinations are of later formation, chiefly since *c* 1550.

For the original sense of verbal and nominal compounds respectively, and later modifications, see Over-. *As over* is of two syllables, there is occasionally a subordinate stress on *a*, even in verbal compounds, where the main stress is on the first syllable. This rises in some to be a distinct secondary stress, distinguishing e.g. *gróve-bréad* ('bread too much') from *óver-bréad* ('bread over'). In cases, the unstressed *over-* is often reduced to *ŏr-*, a single strongly syllable, as *ŏr-bréad*, *ŏr-rúle*, also *ŏur-* with main or secondary stress is not properly reduced to *ŏr-* unless the position allows the stress to be retained, as in *ŏr-crówned*, *ŏr-ríding*, *ŏr-rúling*, *ŏr-sée-ing*, *ŏr-wórk-ing*, *ŏr-wrúght-en*. See notes to *ŏr-*.

I. *Over-* in spatial and temporal senses, and in uses directly related to these.

1. With verbs, or with sbs. forming vbs., in the sense 'over in space, on high, above the top or surface of', as Overbrood, -canopy, -drop, -hang, -roar, etc. Also (*b*) in sense of 'rising above, overtopping', as Over-rise, -top, -tower; and (*c*) with the sense of position implying other notions of which it is a condition or element, as Overeye, Overlook, Overspy, Overwrest, which see.

The compound verb is equivalent sometimes to the simple vb. with *over* adv., as in Chaucer, to lay (something) over; more frequently, to the simple vb. (usually trs.) with *over* prep., as in Overhang, to hang *over* (something). Otherwise, to be over or above (something); but in many cases, as Overarch, it is difficult or impossible to distinguish these.

17-20. With the sense 'in or to excess, too much, too'. Now a leading sense of *over-* in combination with verbs, adjectives, substantives, and adverbs.

In mod.Eng. very common with a negative (esp. in adjs. and their derivatives), as in *not over-literate, not over-obliging, 'he was not over-pleased with the reward'*; in which *not over-* is used by litotes for 'not quite enough', 'somewhat deficiently', and *over-wise* is rather warning in wisdom.

This sense was approached in Gothic by the adv. *ufarassaleiks* 'full to overflowing', and the vb. *ufarhuhtjan* 'to grow exceedingly' (esp. Gr. *περισσεύεσθαι*); it was frequent in OE., expressed by *ofer-*, *of-*, before adjs., nouns of quality and action, verbs with the construction in OHG. behaviour, *ubarhôhan, -muotan, ubarhaft*; cf. MHG. *uberwol*. In OE. it occurs in many adjs., a few vbs., and numerous derivative or other sbs. In OE. and the regular Engl. *over-* was in new combination; its generalized use in mod. Eng. reaches it much more a distinct element, often merely in syntactical construction, so that, except in a few words of old standing, it is usually hyphened to the word which it qualifies.

In verbs, there is a distinct secondary sense in *over-* which may, in case of ambiguity or emphasis, become the most obvious. Adjectives, substantives, and adverbs have normally one sense: *over-at pl.* *over-abundance, -accurately, over-active*; other senses being liable to be subordinated, according to the connection and emphasis. Thus, *an over-right scholar, an elegant blue over-drape*; *we must endure, and even welcome*. In verbs, *over-* is rarely combined *not over-seldom*, and properly only when the sense can be construed, as in *over-wind wound*.

17. With verbs (or with sbs. or adjs. forming verbs). A few more in Ger., e.g. *gebrüllen, -brennen*,

-driven, -fallen, -famous, -grown (some of which however only approach this sense, or may be otherwise explained). ME. added to these, *a* 1300, OVERHEAR, -HEARER (*F. surchargeur*); *a* 1400 OVERHEAR, -LADE, -HEARE, -SEE, *over-dread*, -*ugly*; *a* 1500 OVERBOYE. In the 16th century they begin to abound, as OVERBLOW, -BOIL, -BURDEN, -BUSY, -CLOY, -CRAM, -DARE, -EAT, -FEAR, -GORGE, -LEISURE, -LOAD, -LOVE, -PLEASE, -REACH, -READY, -WEAR, *over-bake, -block, -call, -dull, -dye*. By 1600 it had become allowable to prefix *over-* to any vb. whose sense admitted of it, so that we find, besides those entered as Main words:

a 1700 *over-affect, -argue, -cherish, -chill, -clean, -command, -confuse, -crowd, -dress, -engage, -exhort, -fancy, -fish, -fix, -gird, -grace, -grasp, -hammer, -hunt, -hugge, -hurle, -magnify, -meet, -meddle, -mix, -motion, -multiply, -nourish, -oblige, -pamper, -perfect, -promise, -prove, -reward, -saucy, -set, -store, -think, -till, -ship, -worship*, etc.

Since *c* 1300, the tendency has been to treat *over-* as a movable element which can be prefixed at will to any adj.; and in Sc. and north. Eng. dialects, where *ower, owre* is the regular equivalent of Standard Eng. *too*, it is always written as a separate word. In literary English it is usually hyphened, and, in a small number of combinations of ancient standing and frequent use, which are usually written as single words: e.g. OVERFOND, OVERFULL, OVERMUCH, etc. But even in literary Eng., *over-* is sometimes treated as a separate word, and the combinations that it is made to form in the colloquial strengthened form *over and above*, "not over and above particular".

The more important of these are treated as Main words: see OVERACTIVE, -BITTER, -BOLD, -BUSY, etc. Other examples are: Of OE. age *over-blithe*.

a 1400 *over-saver, -steadfast, -wroth*.

Mod.Eng. *overhear* was app. a new combination in 16th c., meaning perhaps 'hear over or beyond the intended reach of the voice'; or, by analogy of the usual degree 'over-speak, -praise' &c: in sense 3.]

c. (In full, *Overseer of the poor*.) A parish officer (appointed annually) to perform various administrative duties mainly connected with the relief of the poor.

The office was created by Act 43 Eliz. c. 2, and the duties were defined in details (among other purposes) to work, giving relief to the disabled poor, putting poor children to work, apprenticing them, etc., and raising by rate the necessary funds for these purposes; the chief duties now are to assess, collect, and distribute the 'Poor Rate' (the actual relief of the poor is most often now belonging to the 'guardians of the poor'); see Guardian 2 b. In most of the lists of voters for parliament and for municipal and other councils, late 18th, etc. The office belongs to England and Wales, and is gratuitous; but, where the duties require it, paid or salaried overseers are appointed. Officers having duties somewhat similar to those are exercised in the administration of relief in the past, exist in some of the United States of America.

Overtake (ōvəɹtēˑk), *v.* [Early ME. I. OVER- 14 + TAKE *v.*, q. v. for Forms.

Overtake is the earliest assimilated of a small group of compounds (viz., including *overcome*, *overdraw*, *overget*, *overcatch*, to all of which the second element *never take* or *catch*) the original application being apparently to the running down and catching of a fugitive or beast of chase: cf. the synonymous 'catch up'. The sense of *over-* is not so clear. *A priori* we might explain it as 'to take by overreaching, or by getting over the intervening space', and compare *overreach* = reach over or across a space. But it is doubtful whether this was the original notion. Beside these (take to, a fig. sense of *overtake* (viz. 4 below) was expressed before 1200 by *ouergang* and *ouergo*; but in these *over-* can be explained in the sense 'down upon' (OVER- 15 or that this orig. sense would be 'destroy' or 'fall upon'. The sense of 'overtake' was expressed later also by *ouer-hie*, *overcum*, *-takelak*, *overtake*; but these prob. hastened *ouergo* or *overtake*. In Early ME. *overtake* and *ouergo* had the parallel forms OVERGE, OVER, which seem to have been the strictly southern equivalents (cf. the being actually exemplified earlier than *overtake*): the relation between *o* and *over-* here, as well as in OVERAKE, OVERTOOK, has not been clearly determined.]

1. *trans.* To come up with (a person or thing going or running in front of one and in the same direction); to come up to in pursuit; to 'catch up'.

The OTeut. *aig-*, *aih-*, answers to a pre-Teut. *aik-*, ablaut-grade of *eidh-*, the original stem of the present: cf. Skr. *ēdh* to possess, own. This vb. now survives only in Eng. and the Scandinavian langs. (Sw. *äga*, *ägde*, Da. *ie* to own, have). In Eng. it has undergone much change both of form and sense. The original preterite inflexion of the present tense (*āh*, *āht* *āhte*, *āh*, *āgon*) began in late OE. and early ME. to be supplanted by the ordinary pres. tense forms (e.g. 3rd sing., *āhþ*, *owyþ*, *owyt*, *owes*, *owst*, pl. *āgaþ*, *owyþ*, *owyt*, *owen*, etc.); and in mod.Eng. the tense is entirely thus levelled, *owe*, *owest*, *owes*, *-eth*, *own*. The OE. pa. t. *āhte*, ME. *āhte*, *ōhte*, survives as *ought*; but before 1200 this began to be used (in the subjunctive) with an indefinite and hence present signification, in a special sense, and thus gradually came to be in use as a distinct verb from *owe* (for which see OUGHT v.).] Its function as pa. t. of *owe* being supplied in 15th c. by *owned*. The orig. pa. pple. is all the Text. langs. became an adj., of which the mod. Eng. form is OWN *a.*; but as a pa. pple. OE. *āgen* was still used in 16–17th c. as *owne*, *owne*. A later pa. pple. *owed*, *ought*, conformed to the orig. pa. t., is found from the 14th c.: see OUGHT v. 7. The earliest pa. pple. is *owed*; so that the whole verb has now the ordinary weak conjugation *owe*, *owed*, *owed*. The change of signification from *habere* to *debere* can be best traced in the schemes of senses below; but the primitive sense 'have, possess' is not yet extinct in the dialects, which use *owe* or *owe* = *owne*, and have not entirely lost the connexion of *owe* and *ought*.

(Draper, being new to translated English practically a distinct word, has been fully treated in its alphabetical place, and is not dealt with here; but, for the historical development, the two articles OWE, OUGHT, should be read together.)

II. To have to pay.

This branch and the next were expressed in OE., as in the other Teutonic langs., by the vb. *scūlan*, pa. t. *scolde*, *sceolde* (Goth. *skulan*, *skolde*, *skuldum*), mod.Eng. SHALL, SHOULD. The first traces of the mod. use appear in the Lambeth Glosses, which renders L. *debitor culpæ* 'the Reuber...' for the later Ags. Gosp., *scyldiȝ* by the phrase *ages to gyldanne* 'he have to pay'. Examples are scarcely during the following two centuries to show the stages by which this was shortened to the simple *ages*, which is found by 1175 in full use, both in the sense 'to owe (money)', and 'to have it as a duty', 'to be under obligation (*to do* something)', in both taking the gloss of OE. *scolian*. (See also OUGHT v. 6, 7.) The result was that *shall* gradually ceased to have the sense 'owe', retained that of obligation with a weaker force, and became mainly an auxiliary of the future tense; while *ages*, *owes*, *owe*, *owest*, *owe*, in taking *debere* as its main sense, has in Standard Eng. lost that of *habere*, or handed it over to the cognate OWN, which shares it with *have* and such Romanic synonyms as *possess*.

2. To be under obligation to pay or repay (money or the like); to be indebted to, or to the amount of; to be under obligation to render (obedience, honour, allegiance, etc.). Const. with simple dat. or *to*. (The chief current sense.)

2. Chemical words, in which *oxy-* is taken as the combining form of OXYGEN (cf. HYDRO- 2), denoting either simply the presence of oxygen, as in OXYACID, OXYSALT, † -sephor, or the addition of oxygen to the substance denoted by the simple word, and thus practically = *superoxide* or *acid*. For special uses, see OXYCHLORIDE, OXYSULPHATE, and other main words. A looser use is seen in **oxy-alcohol** (= **oxy-spirit**), **oxy-coal-gas, oxy-hydro-gas, oxy-ether,** terms applied (after OXYHYDROGEN, OXYLACTOR) to the flame produced by saturating the vapour of a spirit lamp, ordinary house-gas, or sulphuric ether, with oxygen; so *oxy-alcohol blowpipe, lamp*, etc.; **oxy-paraffin** *a.*, *applied* to a paraffin lamp with arrangement for complete oxygenation of the flame.

But the most frequent use of *oxy-* is as a prefix to names of organic substances, to denote a derivative or related compound in which an atom of hydrogen is displaced by one of hydroxyl (HO); in which sense the more accurate *hydroxy-* is now often preferred: see OXYACID 2.

In earlier use often spelt *oxid-*; before a vowel sometimes reduced to *ox-*: see OX- 2.

The more important of the *oxy-* compounds are treated as main words; the *oxy-* or other *hydroxy-* organic compounds are referred to under, including *a.* & *sb.* *oxy-* or *hydroxy-*acetal ($CH_3CO(OC_2H_5)_2CH_2OH$; -aldehyde ($CH_2(OH)CHO$); -alkyl ($CH_2(OH)R$); -amyl; -anisic; -anthraquinone ($C_{14}H_6O_2(OH)_2$); -arsenic (= dioxyl-); -asparagine (= hydroxy-succinamic); -benzene (= phenol); -benzoic ($C_6H_4(OH)CO_2H$); -benzyl; -camphor ($C_{10}H_{16}O_2$); -cinnamic ($C_6H_4(OH)CH:CHCO_2H$); -cinnamyl; -cotarnine (= hydroxy-cotarnine); -cresol; -cumic; -cyanide ($C_3H_3N_2(OH)$); -diphenyl ($C_6H_4(OH)C_6H_5$); -ethyl (= -ethoxyl); -ethylene (= -glycol); -fatty acid; -formic acid (= glycollic acid); -fumaric acid (= -malic acid); -glutaric acid; -glycol; -hydrindene ($C_9H_{10}O$); -hydrocarbostyril ($C_9H_9NO_2$); -hydrocinnamic (= -melilotic); -hydrocotarnine ($C_{12}H_{15}NO_4$); -hydroquinone ($C_6H_4(OH)_2$); -hydroxyl; -indene (C_9H_8O); -indigo; -indole (C_8H_7NO); -isatin ($C_8H_5NO_3$); -isatoic ($C_9H_7NO_4$); -isatyde ($C_{16}H_{12}N_2O_4$); -isocrotonic; -isopropyl; -isoquinoline; C_9H_6NO; -isovaleric ($C_5H_9O_2H$); -lactic; -lepidine ($C_{10}H_9NO$); -mercury (= basoxy-); -phenol (= -benzene); -phenyl ($C_6H_5O(OH)$); -propionic (= -ethylene); -pyrocinchonic ($C_5H_6O_3$); -pyrotartaric ($C_5H_6O_3$); -sulphuric ($(OH)_2SO_2$); -tartaric; -terpene ($C_{10}H_{16}O$); -tetrahydride ($C_{10}H_{16}O(OH)_2$); -tetrahydrocarbostyril ($C_9H_{13}NO_2$); -tolane; -tri-methylene ($C_3H_5(OH)$); -uvitic; -valeric; -xylene ($C_8H_9(OH)$); -xylic; etc.

Oxyacid, oxy-acid (*ɒksĭæ·sĭd*). *Chem.* Also **oxi-, ox-acid.** [I. OXY- 2 + ACID.]

1. An acid containing oxygen (e.g. carbonic acid, CH_2O_3) as distinguished from a *hydracid* formed by the union of hydrogen with a halogen (e.g. hydrochloric acid, HCl).

b. *attrib.*, or *adj.* Of or belonging to an oxyacid.

2. *Organic Chem.* In plural, a name given to several series of acids derived from those of the fatty or the aromatic series, by the substitution of one or more hydroxyl for one or more hydrogen atoms; hence called more exactly *hydroxy-acids*.

The diatomic monobasic acids derived from the fatty acids $C_nH_{2n}O_2$ have the formula $C_nH_{2n}O_3$, and constitute the *fatty oxy-, oxyethenyl-, oxyl-*, or *lactic* series. The diatomic monobasic acids derived from the aromatic group or benzene derivatives $(C_nH_{2n-6}O_2)$ have the formula $C_nH_{2n-6}O_3$, and constitute the *aromatic oxy-acids* or *oxyphenyl-acids* series.

1877 Watts *Fownes' Chem.* (ed. 11) 551 These acids are called *lactic acids*, after the most important member of the series, and *oxy-fatty acids*, because they may be considered as derived from the acids $C_nH_{2n}O_2$ by substitution of OH for H; thus:

$CH_3.CO_2H$ Acetic acid; $CH_3(OH).CO_2H$ Oxyacetic acid. *Ibid.* 134 These aromatic oxy-acids, like the corresponding acids of the fatty series (the lactic acids), exhibit alcoholic as well as acid characters. 1883 Bloxam *Introd. Organ. Chem.* 225 The first class which presents itself is that of the alcohol acids or acid alcohols; that is, substances which combine within themselves the properties of both alcohols and acids. They are commonly called oxy-acids or hydroxy-acids.

1. One of the non-metallic elements, a colourless invisible gas, without taste or smell. Symbol O: atomic weight 16.

It is the most abundant of all the elements, existing, in the free state (mixed with nitrogen), in atmospheric air, and, in combination, in water and most mineral and organic substances. It combines with nearly all other elements (forming oxides), the process of combination being in some cases so energetic as to produce sensible light and heat (*combustion*), in others very gradual, as in the rusting or oxidation of metals. It is essential, in the free state, to the life of all animals and plants, and is absorbed into the organism in *respiration*; hence it was formerly called *vital air*. Priestley, who isolated it in 1774, holding it to be common air deprived of Phlogiston (q.v.), called it *dephlogisticated air*.

Oxygenize (*ŏksi·djĭnaiz, ŏksi·djĭnaiz*), *v.* [f. Oxygen + -ize; cf. *sacrificize*.] *trans.* = Oxygenate *v.* Chiefly in *pa. pple.* (*or ppl. a.*) **Oxygenized** = Oxygenated.

The oxygenous principle. **1788** Priestley in *Phil. Trans.* 137 The term *phlogiston*...may still be given to that *principle* or thing, which, when added to water, renders it fit to be inflammable air; as the more *oxygenous principle* may be given to that thing which, when it is incorporated with water, makes dephlogisticated air. **1794** Sullivan *View Nat.* I. 233 On account of this property...the denomination of calcareous gas has been given to vital air. **1800** Henry in *Ann. of Phil.* II. 47 The reason of this is, that the oxygenous part of the air has united to the metal. **1813** Mayne *Pharm.* (ed. 2) 3 Ammonitlet (1818) 213 The saltpetre food of the natives of India is of an oxygenous rather than a carbonaceous character.

Now, the most comprehensive of the commissions granted to judges on circuit, directing them to hold assets for the trial of offences. Ozone (*ōzō·un*). *Chem.* [a. F. *ozone* (1840), f. Gr. ὀζ-ειν to smell + -ONE.] An allotropic or altered condition of oxygen, existing in a state of condensation (having three atoms to the molecule, O_3), with a peculiarly pungent and refreshing odour.

It is produced in the electrolysis of water, and by the silent discharge of electricity or the passage of electric sparks through the air (whence it is sometimes perceived after a thunderstorm); it is more active than ordinary oxygen, is a powerful oxidizing agent, liberates iodine from potassium iodide, and, when heated, breaks up into ordinary oxygen, expanding by half its volume.

P.

P the sixteenth letter of the alphabet in English and other modern languages, was the fifteenth in the ancient Roman alphabet, corresponding in position and value to the Greek *Pi*, Π, Π, earlier Γ, Γ, originally written from right to left ⅂, and identical with the Phœnician and general Semitic *Pe*, forms of which were ⅂, ⅂. During its whole known history the letter has represented the same consonantal sound, viz. the labial *tenuis*, or lip unvoiced stop, to which the corresponding sonant or voiced stop is B, and the nasal, M. In English, the simple *p* has always this sound; but it is sometimes silent, as initially in the combinations *ps-*, *pn-*, *pt-* (representing Greek ψ-, φ-, πτ-), and medially between *m* and another consonant, as in *Hampstead*, *Hampton*, *Sampson*, *Thompson*, *Dumpster*, *Tompkins*, where it is not etymological, but has the function of indicating for the preceding *m* the short and semi-sonant value which *m* naturally has before pronounced *p*: cf. *Simpson*, *crimson* (*krimzn*), *kil'mo'n*), with *wimple*, *wimble*. In words from Latin, such as *exempt*, *tempt*, *peremptory*, *assumption*, *consumption*, *redemption*, and some others, as *Humpty-Dumpty*, where the *p* is (as for an English is concerned) etymological or consciously derivational, there is generally in careful utterance an intention to pronounce it, resulting in an incomplete *p*, which we indicate thus tem(p)t, rid(p)mp(ʃən); but, in rapid or careless utterance, the *p* disappears, just as in *Adam(p)ton*, *Thom(p)son*.

The digraph PH, *ph*, is used, in continuation of Latin usage, to transliterate the Greek letter Φ, *phi*, the phonetic value of which is now identical with that of F. The words beginning with PH have thus the same relation to the P words proper that those in CH have to the C words; that is, they constitute an alien group, which, only for alphabetical convenience, occupy a place in the midst of the P words proper, between Ph- and Pl-.

Original P in Germanic or Teutonic represents an Indo-European B. But, *historically*, B was of rare occurrence in Indo-European, and it is not certain that any of the words in which it so occurred were retained in Teutonic, where initial P was consequently very rare. Of the OE. words in P, a few were apparently Common West Germanic, a very few, Common Teutonic; of many of the remainder the origin is quite obscure, but the majority were manifestly adoptions within the historical period from other languages, chiefly from Latin. Notwithstanding these extraneous additions, P remained the smallest initial letter (its exotic K, Q, not being counted) in the Old English or Anglo-Saxon vocabulary, occupying less than half the space of I, and little more than two-thirds of that of V. Its relation to the other exotics, C (= K) and T, and to its own sonant B, is seen by the pages which these occupy in Toller's edition of Bosworth's Anglo-Saxon Dictionary, which are C 50, T 64, B 78, P 84 pages. P might be expected to comprise a correspondingly small part of the modern English vocabulary; on the contrary, it is actually the third largest initial, being surpassed only by S and C, with which it forms a triad of gigantic letters, which include nearly a third of all the words in the dictionary. This result is mainly owing to the vast accessions from Greek, Latin, and the modern Romanic languages (chiefly, of course, from French), and especially to the enormous number of words formed with the Latin prefixes *per-*, *post-*, *pre-*, *pro-*, and the Greek *para-*, *peri-*, *pro-*, along with the PH group already adopted as. But, besides these, P has received great additions, not only in later times from Oriental, African, American, and other remote languages, but, during the Middle English and Modern periods alike, of a multitude of common, familiar, or lower-class words from sources which cannot be traced, often apparently from fresh word-formation. P thus presents probably a greater number of unsolved etymological problems than any other letter.

3. P and Q. a. *To be P and Q* (*Pee and Kew*). According to Bound *Proverbialist* as quoted in Bay. Dial. Dict., this was used in 1870 in Shropsh. and Herefordsh. to the sense 'to be of prime quality'.

Attrib. As to the origin of they nothing has been guessed. An obvious suggestion is that *Q.* (for which the ordinary dots can go for book) refers to the difficulty which a child beginning to read has in distinguishing the turned letters *p* and *q*; others have conjectured some cryptic reference to the words *pardner*, *to part company*. There is no necessary connection between *b.* and *a.*, which belongs to an earlier date. In a still earlier passage than Dekker this 'Now these are by thy *pes* and *cues*', for means the coat as called (see PEA *sb.*), and our sup. either *grace*, or CUE *sb.*¹ means *p* or *q*; but these may have been a puzzling allusion to the expressions here considered, if they were then current.

Pa·ddle-wheel. [See PADDLE *sb.*[1] 3.]

1. A wheel used for propelling a boat or ship: as originally tried, consisting of or having a series of paddles or paddle-like spokes inserted in an axle, drum, or wheel, whence the name; but, eventually, having floats or paddle-boards fitted more or less radially round the circumference, so as to press backward like a succession of paddles against the water. These wheels rotate on a horizontal axis, so that only the lower paddle-boards are under water; they are generally arranged in pairs one on each side of the vessel; in river-steamers, sometimes single and placed in the stern.

Perry called his suggested wheel with actual paddles a 'paddle-wheel'; but the term was not app. avoided by the inventors and theorists of the 18th c., who wrote chiefly of 'the wheel', 'water-wheel', 'moving-wheel', 'revolving vane', etc. And at the eventual employment of the wheel with flat-boards instead of paddles, the name 'paddle-wheel' was at first felt to be inappropriate, but is gradually came in after 1815.

1685 PETTY in *Phytologica* 1.56 (1948) 31. 101 To make the Axis and the Paddle wheels turn round, so as the Paddles may take hold of the water in the nature of Oars one after another successively. *Ibid.* 107 The way...being thicke boarding one way, the oars on the upper deck must beare the other way, to give the Axis and Paddle wheels motion. 1803 G. [*Pondoy* (*pondasoy*, *pudasoy*) in *F. pou-de-soie* (1667 Littré), *pond de soye*, *pond de soie* (1389–94 in Godef. *Complt.*), of uncertain origin; in recent F. spelt *pout-de-soie* and POULT-DE-SOIE, the latter also in 1718 c. English. The forms in *-asoy*, *-asay* represent the 17–18th c. F. pronunciation of *soie* as *sai*, *sawé*, *sawè*; the rimes show this still in 1730 when the spelling was *padusoay*. *Padusoay* is, in appearance, a combination of *Padua*, Eng. name of the Italian city + *F. soie* silk. (Padua has long had manufactures of silk and other textiles, and a kind of narrow silk ribbon is thence named in F. *padoue*, in 1642 *padoüe*: Oudinet). But *Padua soy* could not well be of Eng. formation, since *soy*, *soye*, *soie*, was never in Eng. use. Nor could it originate in French, where '*Padoue* silk' would be *soie de Padoue*, not *Padoue soie*. The probability then is that *padusoay* was an Eng. usurpation of *pou-de-soie* or *pondoy*, 1731, by association with *Padua soy*, a kind of SAY or serge, actually from Padua, which had been known in England since 1633 or earlier:

Note. The word in the preceding senses is known only in English, and in the Anglo-Latin adjunct. The two main early senses were 'scene displayed on a stage', and 'stage or which a scene is exhibited or acted'. The relative order of these is not certain; but, so far as historical facts have been found, the sense 'scene' appears first. The Anglo-L. *pagina* is in form identical with the known ancient L. *pagina* leaf of a book), Fest. 26/1; and it is noteworthy that from *pagina* French had, besides the popularly descended *page*, a literary form *pagine*, *pagene*, 'page of a book'; which also came into Eng. in the forms *Pagene*, *pagyne*, *pagin*, and even by 1526 *page*. Forms which are identical with some of those of *pageant*. There is thus no difficulty so far as concerns form in identifying *pagina* "pagina" with *pagina*, *pagine*, *pagyn*, *pagent*, 'leaf' of 'page'. And it is easy to conceive how the sense 'page' or 'leaf' of a MS. play might have passed into that of 'scene' or 'act'; but direct evidence connecting the two has not been found. On the other hand, some, who take 'stage' as the earliest sense, have suggested for *pagina* a possible passage of sense from 'tables or slab for inscription' to 'board', and so to 'stage'; or have seen in the 14-15th c. Anglo-Latin *pagina* a recent

or less independent formation from the stem *pag-* of L. *pangĕre* to fix, organize with L. *compăgo*, *compāgo*, com. *Anglian* 'fixing together', 'joining', *gemāgnung* 'a band together (various parts, 'framework'); or have thought it a representation, in some way, of L. *pāgina*, Gr. πήγνυ-μι 'a framework fastened or joined together', spec. 'a movable stage or scaffold used in theatres'. This last exactly gives the sense of *pāgina*, 'pageant'; and not only has the Cange examples of *pedi* L. *pāgina* as 'a wooden machine on which stories are placed', but Cangerius has *P. pagmarii* 'a stage or frame whereon Pageants be set or carried'. Thus it is indisputable that 'pageant' in the sense 'stage' would exactly render L. *pāgina*, and it is further true that the sense *page of pāgina* is cognate with *page of* πήγνυ-μι; but of any actual historical relation between the forms of these words, or any passage of *pāgina* into *pāgium* in med.L., there is no trace. It had been supposed that an earlier Anglo-L. example of *pāgium*, in a sense like 'boarding', existed in the first paragraph of the 12th or 13th c. treatise of Alexander Neckham *De Utensilibus*, printed very inaccurately by T. Wright's *Vol. of Vocabularies* (1857) 99, 36–119, from MS. Cott. Titus D. xx, f. 46 b, where Wright has 'de lingnea pagina fiet' where I suggest *pāgium*; but the actual reading of the MS. is 'et lignea de cuvpagine fiet scilicet ista supradicta'; so that the supposed *pāgium* 'boarding' has no existence.
